Targeted Worming Test Instructions

✅ Faecal Worm Egg Count (FWEC)

1. **Find Fresh Droppings**
    - Locate a pile of droppings that is **less than 24 hours old.**
2. **Collect Sample**
    - Take **5 pinches of poo** from 5 different faecal balls in the same pile.
    - Place the collected sample into the **rectangular sample pot.**
3. **Scan QR Code**
    - Scan the QR code on the pot.
    - Input horse and owner details when prompted.
4. **Label the Bag**
    - Write the horse and owner details on the sticker on the **plastic ziplock bag.**
5. **Package and Send**
    - Place the sample in the **pre-paid padded postage envelope.**
    - Post to:
      Robinson Equine Vet & Dental Surgery (REVDS)
6. **Results & Recommendations**
    - REVDS will email results and targeted worming recommendations.

🧪 Equisal Tapeworm Test

1. **Pre-Test Preparation**
    - No food, water, or exercise for **30 minutes prior** to testing.
2. **Collect Saliva Sample**
    - Follow the instructions provided in the packet.
    - Ensure the **colour indicator turns fully pink** on the swab.
3. **Prepare the Sample**
    - Place the swab in the **test tube with liquid.**
    - Attach the **barcode sticker** to the test tube.
    - Write the horse AND owner surname clearly on the test tube.
4. **Package and Send**
    - Place the sample in the **bag** and **seal.**
    - Post in the **thin white plastic pre-paid envelope** to:
      Austin Davies
5. **Results & Recommendations**
    - REVDS will email results and targeted worming recommendations.
